👤 PROFILE

Full-Stack Developer with expertise in building **scalable, modular MERN stack applications**. Skilled in applying **design patterns, MVC architecture, and clean coding practices** to deliver maintainable, production-ready codebases. Strong focus on **responsive UI development** and intuitive user experiences, with hands-on experience in **real-time features, secure authentication systems, and advanced state management**.

📁 EXPERIENCE

MetaDev, Front-end Developer 🔗 Mar 2023 – Jun 2023

- Translated designs and wireframes into high-quality, maintainable React code, improving development speed by **20%**.
- Developed reusable components using Next.js and TailwindCSS, enabling a dynamic, responsive UI.
- Collaborated with a small team using GitHub, Agile sprints, and code reviews for efficient delivery.

🛠 SKILLS

Backend & Database

- Node.js, Express, Prisma, Firebase, MongoDB, JWT

Frontend Development

- React, Next.js, TailwindCSS, ShadCN, Redux, Zustand, TanStack Query

Programming Languages & Tools

- JavaScript, TypeScript, Git, GitHub, Linux, Render, Netlify, Vercel, Docker, Amazon EC2, Socket.io

📁 PROJECTS

Job Portal (HIRECROWD), Sep 2024 – Oct 2024

MERN Stack, TailwindCSS, Tan-stack Query, 🔗

- Developed and deployed** a full-stack job portal that enabled recruiters to post jobs, track applicants, and manage resumes, while allowing job seekers to apply and bookmark opportunities—streamlining the hiring process.
- Implemented secure authentication** with JWT, cookies, and RBAC, protecting sensitive user data and ensuring role-based access for thousands of requests.
- Integrated TanStack Query for scalable **server-side state management** with caching, auto-refetching, and background syncing, which **cut redundant API calls by ~35% and improved app responsiveness**.

QuickChat, Typescript, NextJs, Socket.io, ExpressJS,

Aug 2023 – Jan 2025

Prisma, Tailwind CSS 🔗

- Built and deployed** a full-stack real-time chat app with Socket.io-based messaging, enabling seamless instant communication for users.
- Implemented interactive features** including emoji support, image sharing, voice notes with live audio waveforms, message read receipts, and timestamps—enhancing engagement and usability.
- Added advanced functionality** like online/offline status tracking, message search, and camera integration for instant photo capture, boosting user retention.
- Optimized socket interactions** with Context API, reducing redundant updates and **cutting UI latency by 50%**, significantly improving chat responsiveness.

Streamio, ReactJs, Material UI, Youtube-API 🔗

Nov 2022

- Integrated the **YouTube Data API** to retrieve and display video information.
- Implemented features such as a **search bar, video player** and channel details page.

🎓 EDUCATION

Full-stack Development Bootcamp - JavaScript,
knowledgeHut by upGrad.com 🔗

Feb 2024 – Nov 2024 | Bangalore (online)

Bachelor of Computer Applications,
Saurashtra University 🔗

Jul 2021 – Apr 2024 | Rajkot, India
